DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 12-19, 21-29, 31, 32 are rejected under 35 U.S.C. 102(b) as being anticipated by Kaminski et al (US 6,615,901).

As to claims 12, 13, 23, and 24, Kaminski et al disclose an engine block mold comprising a barrel slab core and cylinder liner (15), wherein the barrel portion has outer diameter taper along at least a portion of its length and the liner has a substantially matching internal diameter taper along at least a portion of its length (figure 3a).

As to claims 14 and 25, the barrel core and is integral with crankcase core (figure 3).

As to claims 15 and 26, Kaminski et al disclose assembling of a cylinder liner (15) to the slab barrel core (figure 3a).

As to claims 16, 17, and 27, the insertion step is done by a robot (col. 6, line 33).

As to claims 18, 19, 28, and 29, the liner is prepared by cleaning and heating.

As to claims 21 and 31, molten metal is poured into the mold with the barrel core and cylinder liner inside mold.

Art Unit: 1725

As to claims 22 and 32, the liner is machined (col. 6, line 45).

Allowable Subject Matter

3. Claims 20 and 30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior arts of record fail to teach cleaning the liner by fluidized bed.
